

BATTERY CHARGER

The **MPL50B** charger from Traction Direct has been designed with the latest JLR workshop standards in mind.

Suitable for most common battery types – Ca/Ca, Ca/Ag, AGM, GEL and conventional lead acid.

The **MPL50B** features Traction's patented de-sulphation technology ensuring the battery is in peak condition before commencing charge.

As with all Traction battery chargers the **MPL50B** is manufactured at our own UK site.

The rectified DC output of the **MPL50B** achieves significantly higher standard of charge than its switched mode competitor.

MPL50B also features a 230V constant output mode for battery support functionality.

FEATURES

- Patented Sulphation Recovery Program
- Short circuit shutdown without blown fuse
- Reverse polarity protection
- Soft start current control
- Fast constant current bulk charge
- 3-stage charging: CI-CV-Float
- Constant voltage float/standby
- Proportional timing – minimal gas emission
- Independent overrun timer
- Battery Support Mode
- 5M detachable output leads
- Accurate zero-crossing voltage sensing
- Flexibility – to match battery specification
- APPROVED BY JAGUAR AND LANDROVER
- Manufactured in the UK

MPL50B
230V

SPECIFICATIONS

INPUT

230VAC

WEIGHT

17KG

SIZE

280 x 260 x 260MM
